

Please do not rule in favor of the Consumer Bankers Association challenge to Indiana's Telephone Privacy law. I am very pleased with the more restrictive Indiana law. I do not want the FCC to impose the federal "established business relationship" exemption on Indiana consumers. If you open the door by even a crack, I fear I will once again have my privacy repeatedly disrupted by businesses calling to sell me additional services. If I want additional services, I will call them.

Thank you.
